BP HYDRAULICS LOCATION

BP Hydraulics is located in Godalming (Surrey), accessible from A3 Carriageway

BP HYDRAULICS (Farnborough) Ltd.

Hydraulic Manifolds

Hydraulic
Manifolds

When you purchase from BP HYDRAULICS you are buying more than just a manifold, you are buying a high quality one. Hydraulic Manifold Blocks combine a high level of performance, innovation, reliability and efficiency.

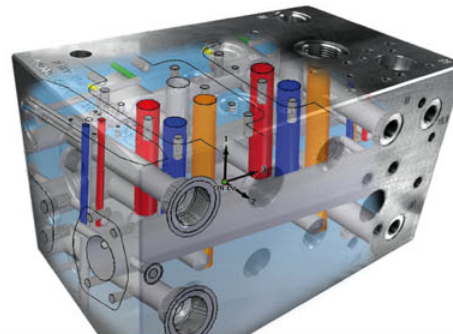

B.P Hydraulics (Farnborough) Ltd.

BP Hydraulics is a company with 30 years experience in manifold manufacturing, based in Godalming, Surrey, UK. Due to our reliable service, quick response and high quality, BP Hydraulics is unquestionably the leader amongst producers of manifold blocks.

The company offers a complete line of Hydraulic Manifold Blocks (from 200 grms up to 2 tonne) in either Steel or Aluminium, which are essential components for Hydraulic Power Pack Units.

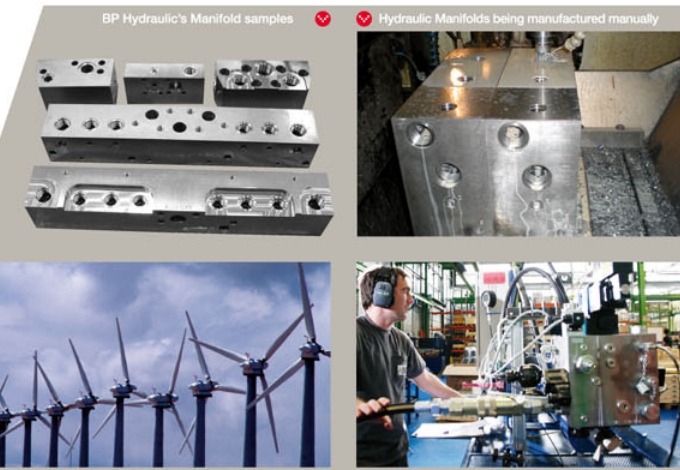

BP Hydraulics can manufacture Hydraulic Manifold Blocks to any technical specification in terms of size, weight and material. Our blocks are always manufactured using high grade raw materials which ensure better performance.

Working intensively, cooperating with the best known companies in different countries such as United Kingdom, Spain, Germany, France, Denmark, USA and China, BP Hydraulics' aim is to grow and to share more market worldwide.

Engineering and designing team

Our in-house engineering and designing team, resources and facilities provide the appropriate Manifold Block manufactured to meet customers requirements. Our designing capability makes BP Hydraulics unique in the Manifold Block field.

BP Hydraulic's Manifold capabilities and applications

With the resources and expertise BP Hydraulics has to offer, we are able to manufacture small batches due to our variety of Radial Drilling machines, plus large batches produced on our CNC machining centres.

Our Manifold Blocks are used in a wide range of applications, the main one being in the area of renewable energy production. BP Hydraulics manufactures blocks for both solar and wind farms in Europe, USA, India and China. In the last years this sector has turned out to be our major field. This is due to the strong and continued growth the renewable energies are experiencing worldwide especially for the big impact they have on the environment. This growth has allowed us to invest in high quality machinery, which has led us to increase productivity, reduced delivery times and ability to offer competitive prices.

B.P. HYDRAULICS OFFERS SIGNIFICANT ATTRIBUTES OF MANIFOLDS BLOCKS:

- ✘ Durability
- ✘ Reliability
- ✘ Quality
- ✘ Corrosion resistance
- ✘ Precision engineered
- ✘ Customized solutions
- ✘ Cost effective
- ✘ Competitive delivery terms
